College of Agriculture
Madison 6, Wisconsin

Dear Doctor Lederberg:

Under separate cover I am sending the two phases of *S. madelia* which you wanted, I am also including a small amount of serum for the two phases. I hope this all reaches you in good condition.

I will be very interested to hear of your results with this work. It would be most interesting if you could cause a recombination of the two phases and thus produce a strain which possesses normal phase variation. This is something that we have not been able to do when we induce changes by the use of serum.

With best wishes, I am

Very sincerely yours,

A handwritten signature in cursive script, reading "P. R. Edwards".

P.R. Edwards,
Bacteriologist
